

Targets on Demand

Sputtering target materials with customised composition and geometry

Broad variety of metallic and ceramic materials

Processing under extreme temperatures up to 2.400°C

Advanced materials for demanding applications

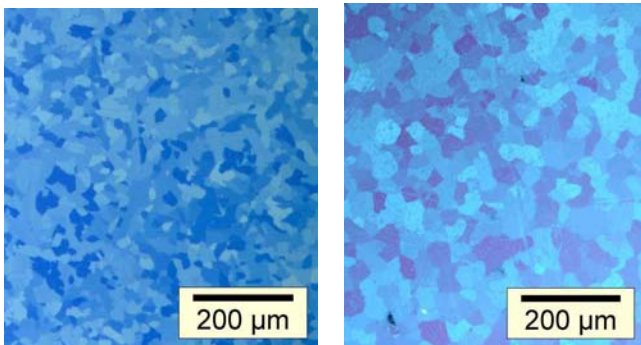

Flexible in Composition

Ranging from pure metals or ceramics to complex compounds thereof

Flexible in Processing

Using of technologies such as pressing/sintering or hot pressing at temperatures up to 2.400°C

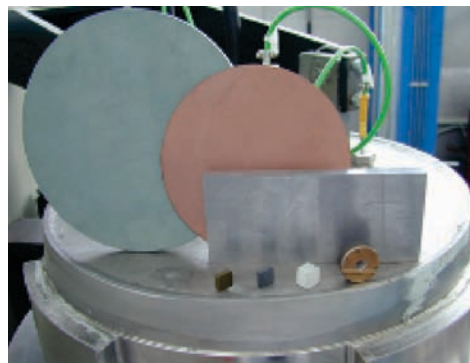

Flexible in Microstructure

Design of microstructure by appropriate selection of raw materials and processing conditions

Flexible in Geometry

Ranging from diameter 50mm to 240mm, rectangular and squares from 40mm x 40mm to 175mm x 175mm
